Product Name: Rancona Summit
EPA Reg. No.: 400-570
Subject: Supplemental Label for Wheat, Barley, Oats, Rye and Triticale
EPA Decision Number: 479488

Dear Ms. Dzialo:

The supplemental labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. It expires on September 13, 2015.

You must submit one (1) copy of the final printed label before you release the product for shipment. Products released for shipment after eighteen (18) months from the date of this letter must bear the new revised label. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA §6(e). Your release for shipment of the product constitutes acceptance of these conditions. A stamped copy is enclosed for your records.

If you have any questions, please contact Erin Malone by phone at (703) 347-0253 or via email at malone.erin@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Hope Johnson for".

SEED TREATMENT EQUIPMENT

RANCONA[®] Summit may be applied with mechanical, slurry, or mist-type seed treating equipment, provided that the equipment can be calibrated to accurately and uniformly apply the product to seed. Uniform application to seed is necessary to ensure best disease protection and optimum performance. Seed should be sound and well cured before treatment. Refer to the label rates below.

In most cases, RANCONA Summit is ready to use and may be applied to seed as-is. However, dilution with water may be appropriate for some types of treaters and/or when treating under dry and/or hot conditions. The amount of dilution water required to achieve uniform coverage of the seed depends on the seed, the treater type and the temperature. RANCONA Summit may be diluted with water up to a total slurry volume of 15 fl. oz./cwt seed (e.g., 2.5 fl.oz. product plus up to 12.5 fl. oz. water/cwt seed or 4 fl. oz. product plus up to 11 fl. oz. water/cwt seed). Mix RANCONA Summit and water thoroughly into a slurry before treating seed. Recalibrate treating equipment to compensate for the addition of water. Contact your local Chemtura representative or supplier for specific recommendations.
